

BUGVA_Collection Installation

To install the BUGVA Collection, save the contents of each folder in the zip file to the corresponding folder in either the **Organization**, or **Workspace** sections of your configuration. When you restart your Bentley application you should see an extra tab on the Drawing workflow that will give you access to all the BUGVA additional content.

If you don't see the extra tab you will have to look at your configuration files to make sure that the **BUGVA_Collection.dgnlib** is in a folder in the **MS_GUIDGNLIBLIST** path. If any of the contents returns a message Not Found, check that the folders you have put the content files into are configured to be found.

Help files are included where required.

Disclaimer of Warrantee

The contents of the BUGVA_Collection is provided "AS IS" and without warranties of any kind, whether expressed or implied, and no warrantee of fitness for a particular purpose is offered. The contents is provided free of any charges or financial obligation, and may be copied, edited, distributed, or used, by any number of users, and can be shared or distributed, but not on-sold or distribution for a fee, can only be distributed as **freeware**.
